THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE  
OF THE UNITED STATES. WITHIN THE MEANINGS OF TITLE 18, SECTIONS 793  
AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVEL-  
ATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON  
IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

The VEB machine plant in Halle has been constructing three sodium electrolysis installations, totalling 454 electrolysis cells, for approximately one year. The installations are scheduled for export to Poland where they will be set up near Auschwitz (Oswiecim). Some of the completed components have been shipped to Poland but most of them are still under construction, partly with other firms. It is expected that the entire order will be executed in about one year.

25X1

Comment. The report refers to an order for the chemical plant in Dwory. The project was worked out by the VEB Engineering and Technical Designing Office (Ingenieur- und Konstruktionsbuero) (KIB) in Leuna. However, it is not clear whether all three plant installations will be shipped to Dwory, or whether one installation will be sent to Brzeg Dolny to the Rokita Plant in Brzeg Dolny (Dyhernfurt), and one to the chemical plant in Moscice near Tarnow.
